

CHAPTER FOUR

RESULTS

This chapter entails the presentation of results of data collected between 5th -26th April 2025.

General characteristics of respondents :

key:

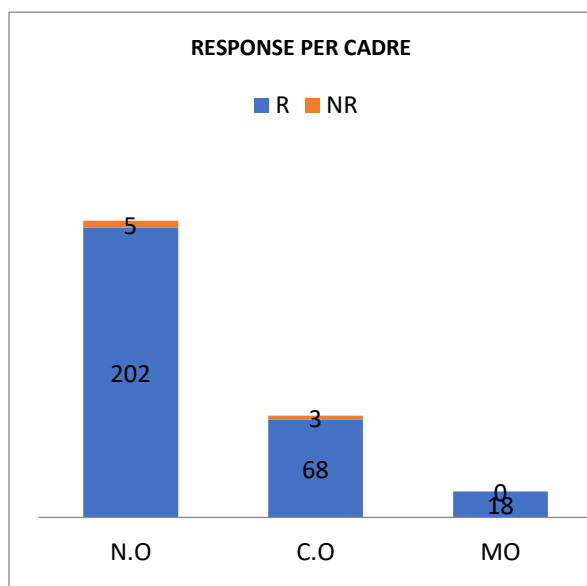

M.O-medical officer,

N.O- nursing officer,

C.O-clinical officer,

N.R-non respondent

FIG 1: General response:

key:

R-response

NR-Non response

N.O- Nursing officers

C.O-Clinical officers

M.O-Medical officers

FIG 2: Response per cadre

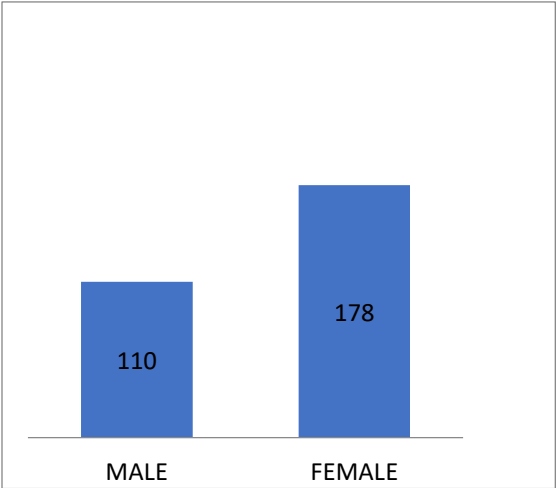

FIG 3: response per gender

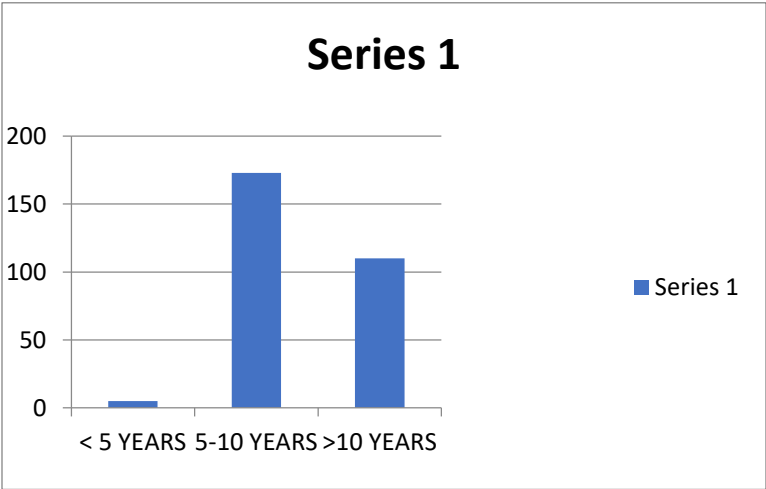

FIG 4: Response per years of experience

Objective 1: To asses knowledge, attitude and practices towards herbal medications among Healthcare professionals that may influence the utilization of herbal medicines among pediatric patients:

Table 1: summary of Healthcare professionals' responses regarding knowledge and attitude on herbal medicine.

	<u>Level</u>			<u>source</u>			<u>enhancement</u>	
	<u>Basic</u>	<u>moderate</u>	<u>advanced</u>	<u>experience</u>	<u>study</u>	<u>others</u>	<u>yes</u>	<u>no</u>
Gender								
Female	131	47	0	62	3	113	114	64
Male	75	35	0	30	2	78	88	22
Total	206	82	0	92	5	191	202	88
Qualifications								
Diploma	158	68	0	71	0	155	152	74
Degree	48	14	0	21	5	36	50	12
Total	206	82	0	92	5	191	202	86
Cadre								
N.O	136	66	0	68	0	134	134	68
C.O	58	10	0	22	0	46	54	14
M.O	12	6	0	2	5	11	14	4
Total	206	82	0	92	5	191	202	86
Experience								
< 5years	3	2	0	0	3	4	9	1
5 – 10yrs	132	41	0	36	2	133	111	57
>10yrs	71	39	0	56	0	54	82	28
Total	206	82	0	92	5	191	202	86

Objective 2: To determine to what extent herbal medicines are utilized by Healthcare professionals among pediatric patients.

Table 2: summary of Healthcare professionals' responses regarding utilization of herbal medicines:

	<u>Prescription</u>		<u>personal use</u>		<u>complementary</u>		<u>alternative</u>	
	<u>Yes</u>	<u>No</u>	<u>Yes</u>	<u>No</u>	<u>Yes</u>	<u>No</u>	<u>Yes</u>	<u>No</u>
<i>Gender</i>								
Female	0	188	160	28	84	66	143	9
Male	0	100	62	36	14	58	71	0
Total	0	288	222	64	98	124	214	9
<i>Qualifications</i>								
Diploma	0	226	156	43	89	94	182	0
Degree	0	62	48	18	9	30	32	9
Total	0	288	204	61	98	124	213	9
<i>Knowledge</i>								
Basic	0	193	142	55	59	83	132	9
Moderate	0	95	79	12	50	41	81	0
Advanced	0	0	0	0	0	0	0	0
Total	0	288	221	67	109	124	213	9
<i>Experience</i>								
<5 years	0	5	3	2	1	2	2	0
5 – 10years	0	147	80	44	63	28	83	9
>10 years	0	135	138	21	35	94	128	0
Total	0	287	221	67	99	124	213	9
<i>Enhancement</i>								
Yes	0	193	169	24	78	87	152	9
No	0	96	52	43	23	37	51	0
Total	0	289	221	67	101	124	203	9

Objective 3: To determine the main factors that may hinder or facilitate utilization of herbal medicine among pediatric patients

Fig 5: summary of Healthcare professionals' response regarding facilitating factors

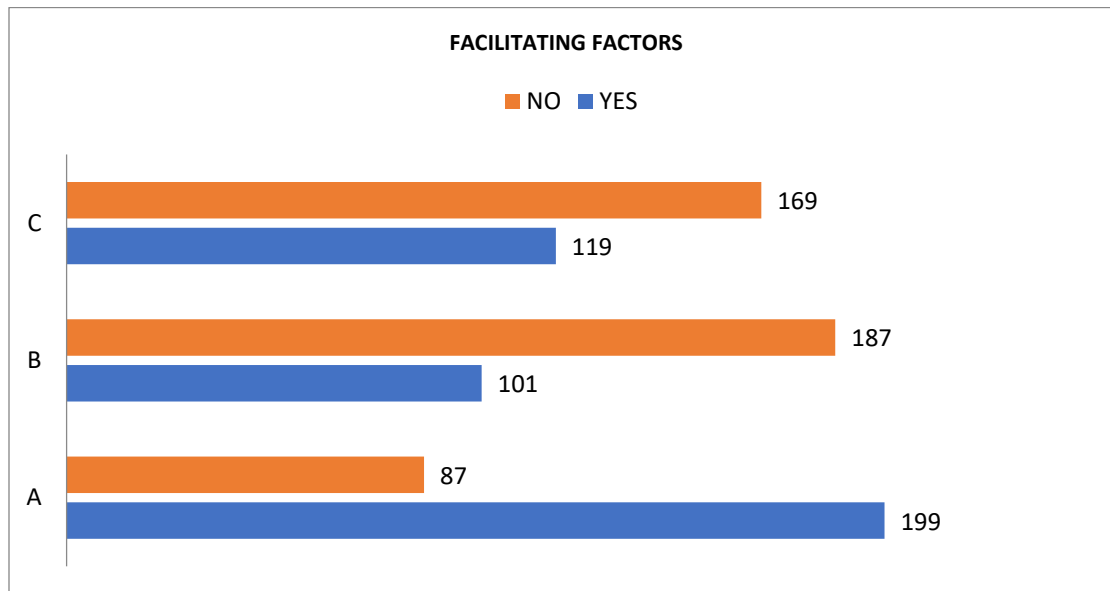

FIG 5: A-low cost of herbal medicines, B-ineffectiveness of modern (conventional) medicines, C-increased side-effects of modern (conventional) medicines.

Fig 6: summary of Healthcare professionals regarding hindering factors.

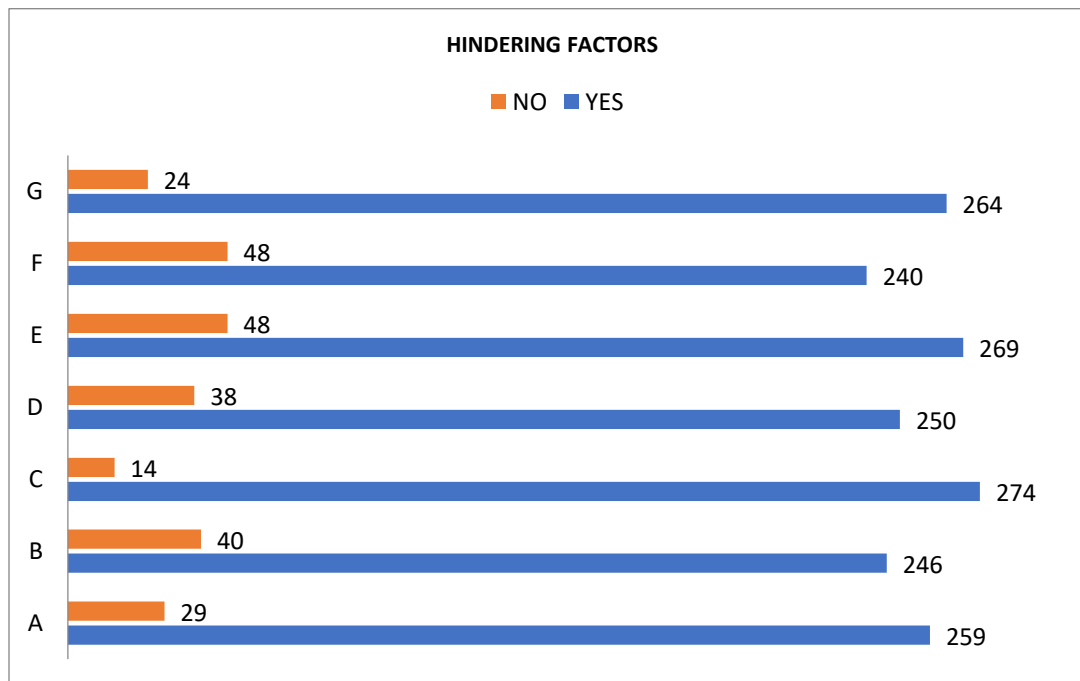

FIG 6: A-lack of sufficient knowledge on herbal medicine, B-lack of availability of herbal medicine, C-fear of professional liability, D-poor quality control on herbal medicine, E- lack of formal regulation of herbal medicine by the government, F-limited information on adverse events of herbal medicines, G-lack of integration of herbal medicines and modern medicines in health care systems.
